

Grantley Adams Airport - Colourful Downspouts

Location Christchurch, Barbados
Designer / Architect Q2 Architects and MBTW Group
Duration May 2004 - Nov 2005

Scope - SML was contracted to fabricate (35) solid aluminum, colourful water downspouts for the Grantley Adams International Airport Expansion Project.

Highlights - Each 2.3 meter tall structure was fabricated from (2) seamlessly welded spun aluminum cones and features (5) waterjet cut rings - designed for aesthetics and support. The structures are powder coated in traditional Barbados' colours.

Waterjet cut rings, and cones prepared for powder coating

Downspouts are ready for shipping with custom crating

Powder coating inside cone

Colourful water downspouts to match the theme of Barbados
